CORE SKILLS

- Unity 2D / 3D
- C# & gameplay systems
- 2D animation & UI
- Physics2D & tuning
- Android / iOS builds

TECHNOLOGIES

- Unity
- C#
- Physics2D
- Tilemap
- uGUI
- Animator
- Git
- Android
- iOS

EDUCATION

- **B.Tech — CS & Engg.**
SKIT, Jaipur · 2022
- **12th — Science**
UP Board · 2017
- **10th**
UP Board · 2015

LANGUAGES

- English
- Hindi
- Bhojpuri

INTERESTS

- Chess
- Hiking
- Mobile gaming

PROFILE

Computer Science graduate with 3+ years of Unity game development experience. Skilled in gameplay mechanics, animation, physics, and performance optimization across Android, iOS, Windows, and Mac. Ships polished 2D titles with strong UI/UX, live ops updates, and store-ready builds. Full-stack internship background (Java, Spring Boot, React, MySQL) for tooling and supporting web services.

EXPERIENCE

Unity Game Developer

May 2023 — May 2026

Vihaa Infotech · Ahmedabad, India · Full-time

- Developed and shipped new game modes to increase engagement and session length.
- Designed and refined mobile UI for intuitive, polished player interactions.
- Managed cross-platform submissions (Android, iOS, Windows, Mac) with store compliance.
- Coordinated patches that improved stability, performance, and player retention.

Full-Stack Java Developer — Intern

1 year

Code Planet Technologies · Contactoo

- Built RESTful CRUD APIs with Java & Spring Boot for contact management.
- Implemented responsive React UI for core user flows.
- Collaborated in a 5-member team; optimized MySQL for faster reads/writes.

PROJECTS

01 Highway Racer 3D

ANDROID · UNITY 3D

Fast-paced 3D endless racing game developed in Unity where players drive through dynamically generated environments, avoid obstacles and traffic, achieve high scores, and unlock different vehicles. Features responsive vehicle controls, speed-based scoring, and mobile-optimized performance.

- Developed a 3D endless racing game with vehicle selection, scoring, collision detection, and mobile controls.
- Implemented physics-based driving mechanics, speed tracking, and high-score persistence.
- Built UI systems including settings, pause menu, game-over screens, and vehicle selection.
- Optimized gameplay performance for Android devices using efficient object management and lightweight assets.

Stack: Unity 6, C#, Unity UI, Rigidbody Physics, PlayerPrefs, Mobile Optimization

Tools: Unity, Visual Studio, Git, Android Build

Release: github.com/Aman6387/portfolio/releases/tag/CarRacing01

02 2D Platformer Adventure Game

ANDROID · UNITY 2D

Fast-paced 2D platformer adventure built for Android with smooth touch controls, challenging enemy encounters, coin collection, and score tracking across multiple themed stages. Designed for one-hand mobile play with responsive on-screen controls, clear HUD feedback (lives, coins, score), and stable frame rates on mid-range devices.

- On-screen joystick, jump button, and touch-optimized movement with tight Physics2D feel
- Multiple levels with unique environments (desert, night/graveyard) using Tilemap workflow
- Enemy AI with patrol patterns, player damage feedback, and animator-driven character states
- Coin pickups, lives system, pause menu, and persistent high-score tracking
- Sprite Atlas + Prefab pipeline for art integration and faster level iteration
- Mobile performance pass: draw-call reduction, collision tuning, and Android build polish

Stack: Unity 2D, C#, Physics2D, Tilemap, Animator, Prefabs, Sprite Atlas, Touch Controls

Tools: Unity, Visual Studio, Aseprite, Tiled, Git, Android Build

Release: [github.com/Aman6387/portfolio/releases/tag/VersionTag\(v1.0.1\)](https://github.com/Aman6387/portfolio/releases/tag/VersionTag(v1.0.1))

03 Bouncy Ball

ANDROID · UNITY 2D · CASUAL ARCADE

A fast-paced casual arcade hypercasual game built in Unity. Guide a physics-driven ball across dynamic platforms, collect coins and gems, use spring boosts, and chase high scores in an addictive vertical climb with polished mobile UI and particle feedback.

- Smooth physics-based ball movement and collision handling
- Dynamic platform layout with springs, coins, and gem collectibles
- Responsive touch controls tuned for one-thumb mobile play
- Score progression, game-over flow, and instant restart loop
- Particle effects, clean HUD, and mobile performance optimization
- Endless arcade gameplay with modern casual visual polish

Stack: Unity 2D, C#, Physics2D, Rigidbody2D, Particle System, UI/UX, Touch Input, Game State Management

Tools: Unity, Visual Studio, Git, Android Build

Release: github.com/Aman6387/portfolio/releases/tag/BB_V1.0.0

04 Word Search Game

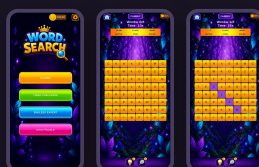

ANDROID · UNITY 2D

Polished mobile word-search puzzle with a magical forest theme. Players find hidden words on an interactive letter grid across Classic, Timed Challenge, Endless Expert, and Daily Puzzle modes—with hints, coin rewards, and full settings control.

- Swipe/drag word selection · live word list, timer & progress HUD
- Hint + Reveal power-ups · coin economy · adaptive difficulty
- Music, VFX, and difficulty settings with persistent save data

Stack: Unity 2D, C#, uGUI, ScriptableObjects, PlayerPrefs, Grid & word placement

Release: github.com/Aman6387/portfolio/releases/tag/WS_V1.0.0

05 Contactoo — Smart Contact Manager

FULL-STACK · JAVA · REACT

Full-stack contact manager with REST APIs, responsive React UI, and MySQL-backed CRUD workflows—delivered in a team internship environment.

Stack: Java, Spring Boot, React, MySQL, REST
